Upcoming Web Event

Small practices and solo practitioners face many challenges and questions as they prepare to submit their 2017 MIPS information. This event features a panel of experts that understand MIPS and work regularly with small practices to help them succeed in MIPS. The panel will answer frequently asked questions by small group practices—including questions posed by people registering for the event and those participants ask online during the event. Join us for an open Question and Answer Town Hall event where panelists will answer your questions related to measure and improvement activity selection, processes for submitting information, implications of the Final Rule, virtual groups and other issues important to small group practices.

Participants will learn:
- Answers to common MIPS questions asked by small group practices
- Practical tips for addressing frequent challenges encountered by solo practitioners and small group practices
- Whether you should be considering a virtual group for 2018 MIPS participation
- How the Final Rule will affect small group practices for 2018
- How to avoid a penalty even if your practice does not use an EHR or participate in a registry
- How to access Free TA Resources available right now

This event is designed for:
- MIPS-eligible clinicians from solo and small practices with 15 or fewer clinicians
- Practice managers and other staff tasked with submitting MIPS data
- Clinician stakeholders such as State and Medical Associations assisting small practices preparing to participate in MIPS

Registration

In order to accommodate schedules and time zones, two opportunities will be provided to participate in this webinar. To register for the event and to list questions you would like the panelists to address, please choose one of the links provided below.

- **Tuesday, November 14, 11:00a.m. – 12:00 p.m. ET**
- **Thursday, November 16, 3:30 p.m. – 4:30 p.m. ET**
