LEARN LEADERSHIP

Purdue Healthcare Advisors provides executive training in Lean Six Sigma with sessions targeted to healthcare leadership.

PHA-guided hoshin kanri brainstorming sessions are devised to capture and cement strategic goals, jumpstarting your hospital’s Lean journey.

Training on specific Lean Six Sigma tools, such as value-stream mapping and theory of constraints, can provide an overview and the framework necessary to support ongoing Lean improvement projects.

"PHA helped our team to think critically about our systems and processes, and see the benefit to both the provider and the patient."

— Jo Ellen Eidam, COO
Adams Memorial Hospital

HOSHIN KANRI
Hoshin = Policy/Direction
Kanri = Management
